ENVIRONMENTAL POLICY

Our goal is to be the leading Northern European refrigeration technology company in environmental responsibility. In our operations, we comply with the UN Global Compact principles also in environmental matters.

We are committed to protecting the environment by preventing air, water and soil pollution, mitigating climate change, reducing our carbon footprint, conserving natural resources and protecting biodiversity and ecosystems. We are also committed to fulfilling our company's obligations and continuously improving our environmental management system in order to improve environmental performance.

Our target is to reduce the adverse environmental impact of our operations and create added value for our customers. The most important areas in this effort are energy efficiency of products and operations, environmental friendliness of materials and sustainable use of resources utilizing circular economy principles.

We take environmental aspects into account in all our operations. We support precautionary approach to environmental challenges and promote environmental responsibility in our supply chain. We are closely involved in international cooperation in our branch creating direction for the future development of environmental matters. We participate actively in the development and implementation of environmentally friendly technologies in our product portfolio and services with the aim of creating sustainable lifecycle practices. We ensure, that all our employees are aware of our environmental protection efforts and are committed to acting accordingly.

Festivo - Porkka Group
